## About Me

I am Abdellah Becherair, a dedicated front-end engineer with a passion for crafting exceptional user experiences. With 2.5 years of experience, I specialize in leveraging the power of React.js and Next.js to create dynamic and responsive web applications. My skill set includes proficiency in HTML, CSS, and JavaScript, along with a deep understanding of UI/UX design principles. I have successfully collaborated with cross-functional teams, effectively translating design concepts into functional and visually appealing interfaces. I thrive in Agile/Scrum environments, embracing continuous learning to stay up-to-date with the latest front-end trends and technologies.

## Skills

- html css javascript
- react js , next js, vite
- tailwind css
- SEO
- git github
- ajax , json
- npm , axios , api

## languages

English

Arabic

## My projects

### App Notes for Mobile

Logo Display Stage: Displaying the application's logo.

Login Stage: Allowing users to log in, or deferring it for later.

Note Writing Stage: Enabling users to write notes.

Home Page Display Stage: Displaying the notes on the main page.

In this project, I conducted a comprehensive planning for the app, starting from sketching it on paper, all the way to converting it into an interactive application in four main stages:

1. Logo Display Stage: Displaying the application's logo.

2. Login Stage: Allowing users to log in, or deferring it for later.

3. Note Writing Stage: Enabling users to write notes.

4. Home Page Display Stage: Displaying the notes on the main page.

I programmed this application using JavaScript, CSS, and HTML, while incorporating some libraries to import specific icons.

### 2 pages dedicated to providing information about a bank

In this task, I was responsible for transforming a design showcasing articles related to a specific bank and the services it offers. I programmed a dedicated interface that introduces the bank and a page that displays the articles. Upon clicking on one of the article boxes, I incorporated some creative visual effects to enhance the aesthetic appeal of the pages. Additionally, I implemented a dark mode feature. You can preview the website through the following link

<https://vsbzlB7r6izydvfcmmimzmg.on.drv.tw/prjBanks/>

## Education

### Computer Science Sophomore

Kasdi merbah , ouargla

Currently pursuing computer science at kasdi merbah university. Expected graduation date: 2025
